

EXP NO: 2	AZURE DEVOPS PROJECT
DATE:	SETUP AND USER STORY
	MANAGEMENT

AIM: To set up an Azure DevOps project for efficient collaboration and agile work management.

1. Create An Azure Account

2. Create the First Project in Your Organization a) After the organization is set up, you'll need to create your first project. This is where you'll begin to manage code, pipelines, work items, and more. b) On the organization's Home page, click on the New Project button. c) Enter the project name, description, and visibility options:

- **Name:** Choose a name for the project (e.g., LMS).
- **Description:** Optionally, add a description to provide more context about the project.
- **Visibility:** Choose whether you want the project to be Private (accessible only to those invited) or Public

(accessible to anyone). d) Once you've filled out the details, click Create to set up your first project.

The screenshot shows the 'Create new project' dialog box. It has a title bar with a close button (X). The form includes a 'Project name' field with the text 'Online_Marketplace_Platform', a 'Description' field, and a 'Visibility' section with a 'Private' radio button selected. Below this is an 'Advanced' section with two dropdown menus: 'Version control' set to 'Git' and 'Work item process' set to 'Agile'. At the bottom are 'Cancel' and 'Create' buttons.

3. Once logged in, ensure you are in the correct organization. If you're part of multiple organizations, you can switch between them from the top left corner (next to your user profile). Click on the Organization name, and you should be taken to the Azure DevOps Organization Home page.

The screenshot shows the Azure DevOps Organizations page. The top navigation bar includes the Microsoft logo, the user's name 'Hari Prasanna S', and a 'Sign out' link. The main content area is divided into two columns. The left column shows the user's profile with a circular avatar containing 'HS', the name 'Hari Prasanna S', an 'Edit profile' button, and a 'Microsoft account' dropdown. Below this is a section for 'Visual Studio Dev Essentials'. The right column is titled 'Azure DevOps Organizations' and features a 'Create new organization' button. It lists the current organization 'dev.azure.com/hariprasannas2024aiml (Owner)' with a list of projects: 'Attendance managemnet', 'Attendance Marking and Report Generation', 'Attendance Marking', and 'Online Marketplace Platform'. There is also a 'New project' link. Below the current organization, two other organizations are listed: 'dev.azure.com/dhanujag2024aiml (Member)' and 'dev.azure.com/haripreethcj2024aiml (Member)'.

4. Project dashboard

5. To manage user stories: a. From the left-hand navigation menu, click on Boards. This will take you to the main Boards page, where you can manage work items, backlogs, and sprints. b. On the work items page, you'll see the option to Add a work item at the top. Alternatively, you can find a + button or Add New Work Item depending on the view you're in. From the Add a work item dropdown, select User Story. This will open a form to enter details for the new User Story.

The screenshot shows the 'Work Items' page in Azure DevOps. The left-hand navigation menu includes Overview, Boards, Work Items, Backlogs, Sprints, Queries, Delivery Plans, Analytics views, Planning Poker, Repos, Pipelines, Test Plans, and Artifacts. The main content area displays a list of work items. The table has columns for ID, Title, Assigned To, State, Area Path, Tags, Comments, and Activity Date.

ID	Title	Assigned To	State	Area Path	Tags	Comments	Activity Date
97	submit button	Unassigned	New	Online Marketplace Platform			4/23/2026 8:12:05 AM
