

EXP NO: 5 DATE:	POKER ESTIMATION
--------------------------------------	-------------------------

AIM: Create Poker Estimation for the user stories - Student Management System.

Poker Estimation:

The screenshot shows the Azure DevOps Planning Poker interface for a project named 'Online Marketplace Platform'. The board is titled 'Poker game, Feb 20, 2026' and is for the user story 'Secure User Login'. The board shows a 'Reveal' button and a row of cards with values 0, 1, 2, 3, 5, 8, and 13. The card with value 5 is selected, and a 'Your vote' label is visible. Below the cards, there is a 'Reference items' section. The 'Game scope' section shows a table with columns 'Work item', 'State', and 'Estimates'. The table contains one row for 'Secure User Login' with state 'New' and estimate '-'. The right sidebar shows the user story details, including the description 'As a user, I want to login using my credentials so that I can access my account securely.', acceptance criteria, and a list of criteria: 'Username & password fields available', 'Password masked', and 'Valid login redirects to dashboard'.

RESULT: The Estimation/Story Points is created for the project using Poker Estimation.
